

Bitrise empowers Qonto to deliver faster and increase customer satisfaction

75% faster release cycle

Faster access to Xcode beta

Hassle-free maintenance

Summary

Qonto simplifies banking and financial management for SMEs, startups, and entrepreneurs. As an online-only business, enhancing its mobile app experience is crucial. It partnered with Bitrise towards these goals: streamlining its mobile development and enhancing its app capabilities to support its expansion across Europe.

The result: quicker releases, reduced maintenance overheads, and faster deployment of new financial features for customers.

About Qonto

- Leading finance management solution provider
- 100% online
- 1,600 employees
- 500K+ customers

Challenge

Qonto wanted to improve the efficiency and stability of its mobile app development to meet the changing needs of its growing customer base. Its existing setup was highly manual, requiring frequent updates across multiple operating systems. Maintaining its own CI solution was also unsustainable. With ambitious growth plans and a focus on European expansion, it was clear Qonto needed a new approach to mobile development to stay competitive and increase customer satisfaction.

“We strive to stay competitive by delivering faster and providing an exceptional customer experience. Our goal is always to release the features they need as quickly as possible.”

Francisco José Cantero González
Staff iOS Engineer at Qonto

“Our goal is always to deliver the perfect product, and now we can dedicate more time to that without worrying about infrastructure or maintenance. It’s been a huge win for us.”

**Francisco José Cantero
González**
Staff iOS Engineer at Qonto

Solution

Qonto successfully migrated from its legacy mobile development set-up to Bitrise’s mobile CI/CD solution. The team has continued to expand its use of Bitrise to improve its mobile development workflow, utilizing valuable features like save-cache to accelerate its release process.

“Bitrise’s velocity, availability, and stability made it a clear choice for us.”

**Francisco José Cantero
González**
Staff iOS Engineer at Qonto

Bitrise solutions

Results

- ✓ **Improved testing efficiency:** Qonto can run tests faster and test multiple features simultaneously. New versions and updates are also simplified by Bitrise Maintainers.
- ✓ **Faster release cycles:** Qonto has reduced release time by 75% – delivering new features and updates faster.
- ✓ **Reduced maintenance overhead:** Bitrise’s fully-hosted CI allows the team to focus on higher-impact tasks.
- ✓ **Cost and time savings:** Bitrise’s faster development and pipeline cycles improve efficiency and save time.
