

Case Study: FTI Consulting — M&A Communications

Published: January 30, 2019 **URL:** <https://www.caplinked.com/blog/fti-consulting-finds-success/>

Background: FTI Consulting is a leading advisory firm with expert consultants across industries ranging from Aerospace and Defense to Telecom, Media, and Technology. Their M&A team has deep experience in acquisitions, corporate sales, joint ventures, mergers, corporate finance, and restructuring. As part of their M&A communications services, they share confidential data with external parties and needed a virtual data room provider they could trust to keep data secure across all stages of the deal lifecycle. An external reference pointed them to CapLinked.

Solution: FTI was immediately impressed with the robust CapLinked platform and its ease of use. They were up and running within minutes and prepared to share confidential documents with external parties. CapLinked provided a straightforward, professional experience that removed the complications other systems had introduced. FTI rests easy knowing their data is secure with CapLinked.
