

Case Study: Canadian Wildlife Federation

CWF, Founded in 1962, Canadian Wildlife Federation (CWF) aims to conserve Canada's wildlife and habitats, enabling the use and enjoyment of nature by all Canadians. The mission of CWF via its programs is to ensure the conservation – and to transmit this desire for conservation – of the fauna, flora and natural environments of Canada.

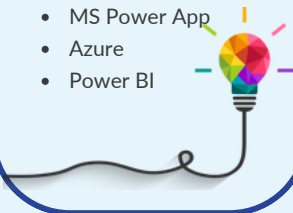

Challenges

- Excel based data management
- Access Management based on roles
- Manual workflows to manage participant intake
- Lack of interactive Dashboard & reports
- Incident reporting

Solution

MS Azure Cloud Implementation

- Constituent Management
- Share point & Docusign integration
- MS Power Portal
- MS Power App
- Azure
- Power BI

Benefit

- Power platform enabled integrated CRM system
- Integrated portal to manage participant intake based on location
- Role based security access mechanism.
- Electronic signature with streamlined document management
- Interactive dashboard to monitor growing program needs
