

The Challenge:

When **TelevisaUnivision** launched its video streaming platform Vix in 2022, it quickly became a key market player. They **needed deep insights into customer behavior** and retention, going beyond BI capabilities.

By seamlessly integrating with their central data warehouse and customer data platform, **Kubit provided their team with self-service insights by combining content, subscription, and user behavior data.**

*“Kubit is so **quick and user-friendly**. I can just filter by platform and release to **immediately get my questions answered**.”*

Isabella Poleo
Senior Product Analyst

RESULTS

10X increase in **data access** across their team

KEY METRICS GAINED:

Most popular shows

7-day retention

of DAUs and MAUs

Avg. watch time/user

- **3500+ data queries per month** from 50+ users
- **4X increase in platform adoption** in under 12 months
- **Enhanced user experience** with monitoring and alerts for product anomalies
- **26% boost in converting** new viewers to loyal customers
- **Self-service data access** reduced expensive IT hiring costs
