How County College of Morris transformed file sharing with pCloud

CCM proudly graduates 1,000 students each year, with one of the highest graduation and transfer rates among New Jersey's community colleges.

County College of Morris offers 50+ associate degree programs alongside certificate and workforce-development tracks. More than 200 transfer agreements give students a seamless path to four-year institutions.

THE CHALLENGE

- 01 Stalled file sharing.** Sharing live working documents inside the marketing creative team was difficult.
- 02 Unreliable legacy tool.** Their previous platform, OneDrive, was slow and unreliable for everyday collaboration.
- 03 No coverage when out.** When a team member was out of office, colleagues couldn't pick up their files.

A faster, safer way for the team to work

CCM moved its creative team onto pCloud for budget-friendly licensing, enterprise-grade encryption across academic and administrative files, and live, seamless access to shared folders — so work keeps moving no matter who's in the office.

RESULTS & IMPACT

- ✓ **Seamless continuity.** When someone's out, a colleague picks up exactly where they left off.
- ✓ **In sync, in real time.** Live folder access keeps the creative team aligned across projects.
- ✓ **Secure & cost-effective.** Enterprise-grade encryption on a plan that fits the college budget.

KEY BENEFITS

Budget-friendly licensing

Enterprise-grade encryption

Live seamless sharing

Effortless team continuity

“The ability to have live sharing is super helpful.”

Gina Garcia

Creative Services Manager, County College of Morris

Balanced note: occasional outages or brief "zero-byte" file states can surface on tight deadlines — weighed by the team against clear gains in continuity and security.
