Secure email and calendar made easy

Proton Mail is the simplest way to protect your communications with end-to-end encryption. No extra software, no extra steps. Prevent data breaches and stay compliant with privacy laws.
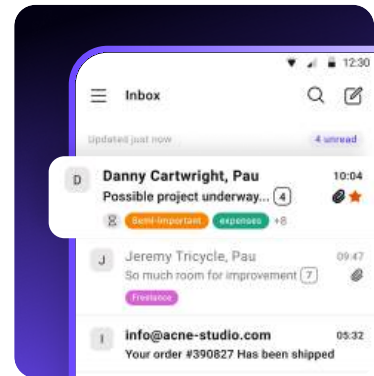

Email is the backbone of your business. Yet email is a prime target for hacks and phishing attacks. Data breaches are becoming more devastating, costing organizations $4.88 million on average in 2024.

But there are ways to mitigate your risk by using end-to-end encryption and stopping scam emails and malware in their tracks. Proton Mail for Business helps organizations meet these challenges by providing secure email and calendar services that are end-to-end encrypted by design.

Proton is easy to set up and deploy in minutes. There's no learning curve: The encryption happens automatically in the background, so your team can focus on staying productive. Protected by Swiss privacy laws, Proton Mail keeps your business data confidential and under your control.

Proton Mail is ideal for:

- **Legal and consulting services:** Protect confidential client communications and sensitive business information.

- **Tech startups and small dev teams:** Secure project, client, and IP-related communications.

- **Healthcare organizations:** Meet HIPAA compliance requirements and safeguard patient communications.

- **Privacy-conscious companies:** Ensure confidentiality with Swiss-hosted, privacy-first email—outside US and EU jurisdiction.

- **Small- and mid-sized businesses:** Get professional-grade email and calendar security without expensive overhead or IT complexity.

Why Proton Mail?

🔒 Secure sensitive communications

🛡️ Simplify compliance with privacy laws

✉️ Stay productive with encrypted email and calendars

Trusted by over
100 million people

50,000 businesses
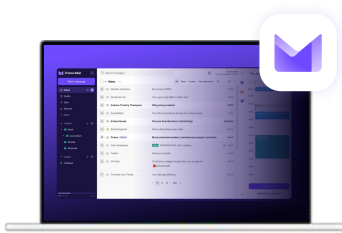

Key benefits

Protect sensitive communications with end-to-end encryption

Emails, attachments, and calendar events are encrypted on your device before they reach our servers. Only you and your intended recipients can read your communications — not even Proton can access them.
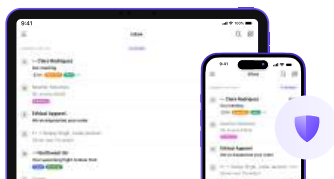

Simplify compliance and earn your clients' trust

Proton Mail helps your business meet GDPR, HIPAA, PCI, SOC 2 type II and other regulatory requirements by protecting sensitive information by default. Secure communications show clients, patients, and partners that you take data protection seriously.

Stay productive with easy-to-use, professional tools

Proton Mail and Proton Calendar offer all the features your team needs to onboard quickly and stay productive: Easy Switch for quick migration, customizable domains, integrated AI writing assistant, and 24/7 support.

Work securely across all your devices

Your team can access secure email and calendars from any device with dedicated Proton apps for web, Windows, macOS, iOS, and Android. Automatic syncing keeps information up to date, no matter where your team works.

Trusted by over
100 million
people

Trusted by millions for privacy

Proton is based in Switzerland, never sells your data, and values transparency — our open-source apps undergo regular security audits. Our only mission is protecting your organization's data to build a more secure internet.

Key features

Security and privacy

- **End-to-end encryption:** All emails, attachments, and calendar events protected against hacks and surveillance

- **Zero-access architecture:** Proton cannot read your data — you're in control

- **Secure integrations:** Integrate Proton Mail with your business applications through automated forwarding and SMTP submission

- **Password-protected emails:** Send end-to-end encrypted emails to non-Proton Mail addresses

- **Phishing protection:** Email security features to detect suspicious messages and links

- **Hide-my-email aliases:** Protect your real email addresses when signing up for services

- **Open-source and independently audited:** Apps are vetted by security experts

Secure collaboration and productivity

- **Custom email domains:** Use your own business domain for a professional presence

- **Private AI-powered email:** Write better emails, faster, with Proton Scribe, our privacy-first writing assistant

- **Proton Calendar:** Create calendars for different teams, projects, or events. Share them and see when colleagues are available — no more back-and-forth

- **Schedule, undo, or snooze emails:** Stay organized and in control of your inbox

- **Multiple addresses per user:** Create role-based addresses, like support@, sales@, etc.

- **Scale up easily:** Flexible storage plans to fit your organization's needs

- **Advanced search and filters:** Set custom rules to automate your inbox

Administration and compliance

- **Centralized user management:** Add, remove, or update users easily from the admin dashboard

- **Group email addresses:** Set up team distribution lists

- **GDPR, HIPAA, and PCI compliance support:** Proton's privacy-first design helps organizations strengthen data protection practices.

- **ISO/IEC 27001 certification:** International standard for information security management

- **SOC 2 type II audited:** Proven adherence to trusted security standards
