Swiss Re Institute

Customer Testimonial

“At **Swiss Re Institute**,  
we are more than just customers

- we are avid advocates and

**immensely satisfied partners.”**

“

*For over six decades, Swiss Re Institute has been at the forefront of client education in the reinsurance industry. Our mission has always been twofold: to nurture new markets and to strengthen customer loyalty through exceptional training. This approach has not only benefited our clients but has also directly enhanced our position as a premier reinsurer. Our success in this endeavor is, in no small part, due to the revolutionary role played by Eureka.*

*Eureka's Learning Management System and web-shop have been game-changers for us. Their comprehensive platform seamlessly replaced multiple disparate systems and lists, catapulting our efficiency to new heights. This integration has significantly streamlined the management of our client programs. It has empowered our client managers with more effective distribution strategies for our offerings and provided our clients with a convenient, one-stop-shop for all their learning needs.*

*But the transformation doesn't stop there. Eureka has been instrumental in helping us convert our proprietary knowledge into accessible self-study material. Their platform also simplifies the ongoing task of content creation and maintenance, ensuring that our material is always current, relevant, and engaging.*

*The Eureka team has been exceptional. Their deep understanding of how client training integrates into the reinsurance business model is impressive. They have tailored the Eureka platform to meet our specific needs and those of other clients with similar requirements. Eureka's commitment to solving challenges in customer training is unparalleled. They consistently bring innovative solutions to the table and have a commendable track record of delivering on time and within budget.*

*At Swiss Re Institute, we are more than just customers of Eureka - we are avid advocates and immensely satisfied partners. Our heartfelt thanks go to Nick Etlar Eriksen, Chief Technology Officer & Founder, for his unwavering dedication and the countless hours spent in collaboration with us. His expertise has not only solved our challenges but also significantly enhanced the satisfaction of our clients with the Swiss Re Institute programs.*

*We look forward to continuing this fruitful partnership and are excited about the future possibilities this collaboration holds.*
